## SUMMARY

Full-Stack Software Engineer with 8+ years of experience building and scaling production web applications across React, Node.js, and .NET Core. Consistent track record of delivering measurable outcomes: **30% lift in user engagement**, **40% reduction in deployment time**, and 200+ systems shipped end-to-end. Combines deep technical execution with an entrepreneurial mindset — having founded and operated a technical consulting business before transitioning into senior engineering roles. Thrives in remote-first, agile environments and known for writing clean, scalable code that moves business metrics.

---

## EXPERIENCE

### Lead Full-Stack Engineer - Fourth Era

2022 – 2026

- Architected **5+ end-to-end platform redesigns** using React, HTML5, and CSS3, increasing user engagement by **30%** and improving Core Web Vitals performance scores by **20%** across all properties.
- Engineered and owned end-to-end CI/CD pipelines (GitHub Actions), **reducing release cycle time by 40%** and cutting production incidents by 25% across 10+ live applications.
- Scaled back-end services in **C# / .NET Core**, designing RESTful APIs that maintained **99.9% uptime** under peak traffic loads of 50,000+ monthly active users.
- Led a distributed team of 5 engineers across 3 product squads using Git-based workflows and Agile/Scrum, cutting code-review turnaround by **35%** and accelerating sprint velocity.

### Application Developer - Solemn

2021 – 2022

- Shipped production React and Node.js features for a **10,000+ user SaaS platform**, reducing average page load time by **22%** via component-level code splitting, memoization, and lazy loading.
- Built 4 internal Node.js automation tools with Git webhook integrations, **eliminating 40% of manual engineering workflows** and reclaiming ~15 hours of developer time per week.
- Refactored a legacy monolithic codebase and introduced CI/CD pipelines, **reducing critical bug rate by 30%** and accelerating release cadence from monthly to bi-weekly.

### Founder & Principal Systems Engineer - Anthonab

2017 – 2021

- Founded and scaled an independent technical consulting practice, **delivering 200+ custom high-performance systems** (gaming and AI workloads) to clients with exacting specifications — achieving a 95%+ client satisfaction rate.
  - Managed full project lifecycle across all 200+ engagements: scoping, architecture, build, integration, and delivery — developing the systems-thinking foundation that underpins current software engineering practice.
  - Built internal tooling with **Node.js and Git** to automate client intake, configuration tracking, and operational workflows, reducing per-project overhead by **30%**.
- 

## SKILLS

### Languages

JavaScript (ES6+), TypeScript, C#, C++, HTML5, CSS3, Lua

### Frameworks

React, Node.js, .NET Core, Express.js, Bootstrap

#### Tools & DevOps

Git, GitHub Actions, CI/CD Pipelines, REST APIs, Webpack, Agile/Scrum

#### Databases

MySQL, PostgreSQL, SQL Server

---

#### EDUCATION

**A.A.S., Computer Science - Bronx Community College**

2020 – 2023

---

#### KEY PROJECTS

**Custom Speed Zone System** — Engineered a real-time competitive platform with dynamic speed zones, live leaderboards, and admin tooling — optimized rendering pipeline to achieve sub-100ms response latency.

**SliverAI Automation Tool** — Architected a scalable, API-driven task automation platform that reduced manual operational workload by 40% across a cross-functional team of 8; built on Node.js with REST API integrations.

**Portfolio Website** — Built a fully responsive, SEO-optimized portfolio achieving a 95+ Lighthouse performance score with all Core Web Vitals in the green.
